

***International Conference on Social Work and Counselling
Practice
June 1-5, 2009***

Workshop 1: *“Current Realities of Practice Evaluation”*

Abstract 1: This workshop will focus on how the field of social work has evolved from case wisdom → empirically supported practice → EBP. It will present how we can incorporate current methods used in EBP to support our ability to provide more ethically appropriate interventions with our clients.

Outcomes 1: a) to identify how social work has evolved to the current level of EBP, b) to identify how EBP can be incorporated into one’s practice repertoire, and c) to develop a strategy for using EBP in health and human service organizations where individuals may work.
